

2023 GNC ANNUAL REPORT

Country-level

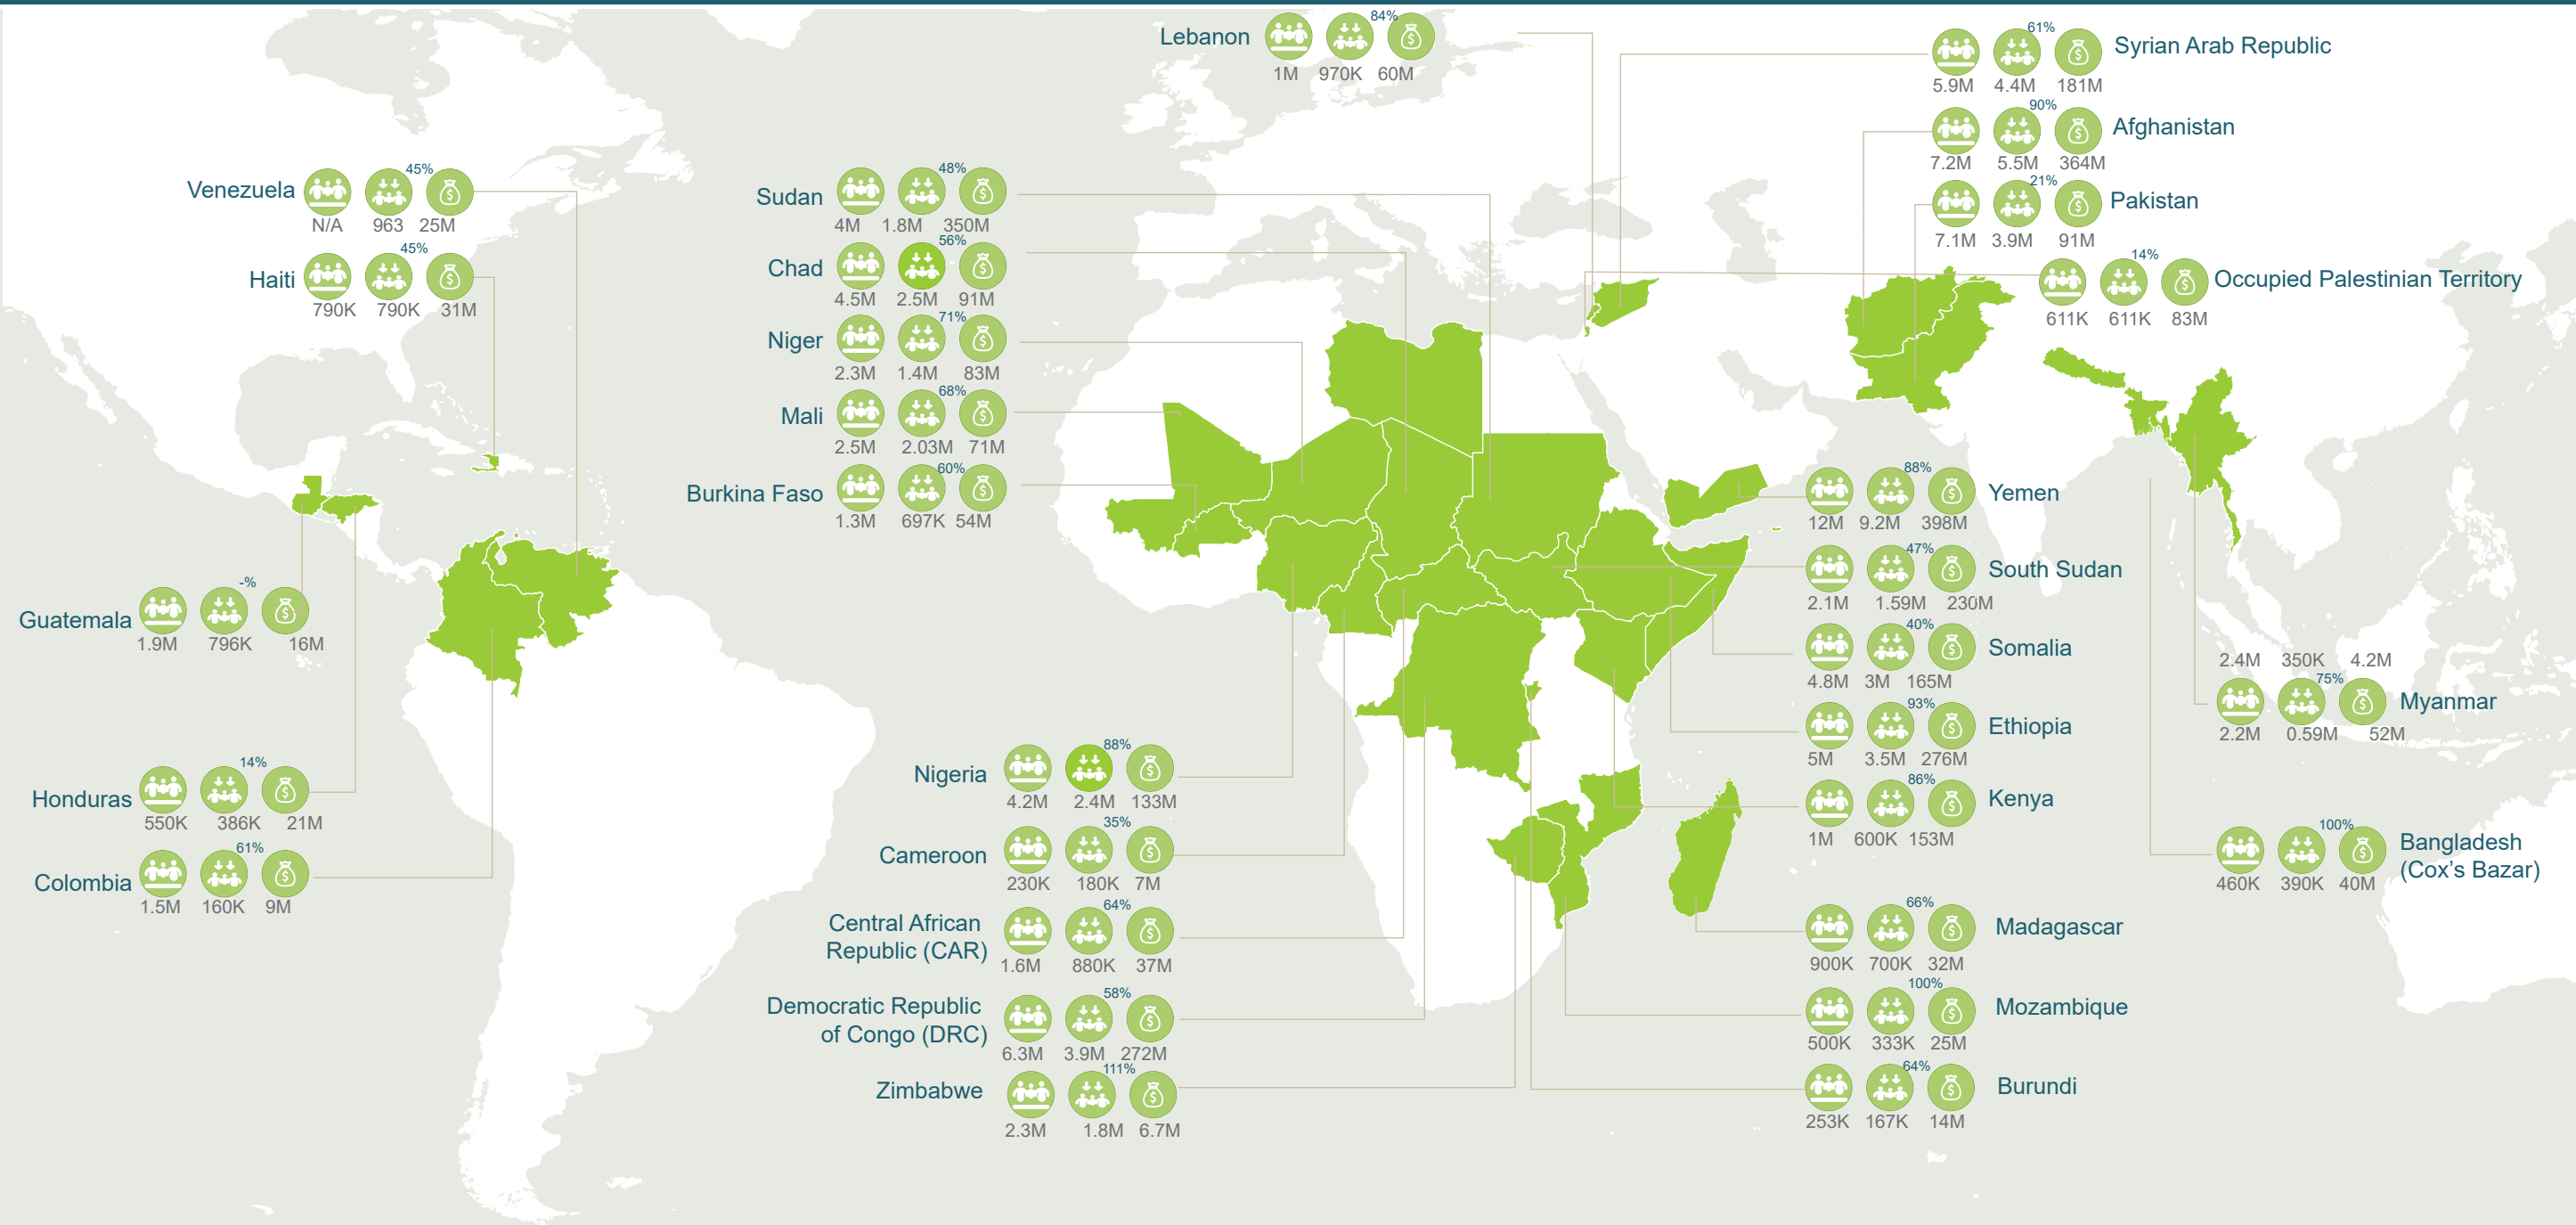

COUNTRY SUMMARY

The GNC supported a coordinated response in 31 countries across Africa, Asia and Latin America assuring a timely and effective response to nutrition in emergencies (NiE). Of these countries, 22 (Afghanistan, Burkina Faso, Cameroon, Central African Republic, Chad, Democratic Republic of Congo, Ethiopia, Haiti, Lebanon, Madagascar, Mali, Mozambique, Myanmar, Niger, Nigeria, Somalia, South Sudan, State of Palestine, Sudan, Venezuela, Whole of Syria, and Yemen) had an activated nutrition cluster, seven countries (Bangladesh, Burundi, Cox's Bazar, Guatemala, Kenya, Pakistan, and Zimbabwe) had a national nutrition sector coordination mechanisms, and two (Colombia and Honduras) had other coordination mechanisms in place.

In 2023, 83.4 million people were identified as people in need of nutrition interventions. In the above countries, the estimates for people in need (PiN) decreased by 6 million compared to 2022 (89 million PiN), similarly the number of people targeted decreased by about 2 million, totaling 54 million people in 2023. Of those targeted, the GNC was able to reach 67% (36 million) with the necessary support, including a total of 43.9 million children and women reached through emergency nutrition response services in 2022.

About 1 billion USD (31%) of funding was received by nutrition partners out of 3.3 billion USD requested in 2023. By the end of 2023, 10 countries (Cameroon, Guatemala, Haiti, Honduras, Pakistan, Occupied Palestine Territory, Somalia, South Sudan, Sudan, Venezuela) received less than 50 percent of the funding requested.

Population in need
83.4M

Population targeted
54M
 67% (36M) reached out of targeted

Funding requirements
3.3B US\$
 31% 1B US\$ funded
